

CARE PARKING

Finding car parks with ease

With the increase in car usage, problems such as traffic congestion, environmental damage, and disease have increased. We created care parking in order to provide users with multiple modes of transportation, such as

Care Parking provides multiple driving options for the users . Users can choose the fastest route according to their itinerary.

The parking spaces on the map offer people the closest parking routes, which is convenient for people to find suitable parking lots and avoid detours. These methods are effective in avoiding more harmful gas emissions and

cycling, and walking. They can sometimes replace driving as a more convenient mode of transportation.

On this basis, we further help the drivers to quickly find parking spaces to reduce the road traffic and congestion caused by looking for parking spaces. This is the reason why we focus on "parking places" on our map.

traffic congestion. They also provide people with convenience in life.
